

## Across the Great Divide - Kate Wolf

**D**                    **G**   **D**  
I've been walking in my sleep  
         **Bm**                                    **G**  
Counting troubles 'stead of counting sheep  
         **D**                                    **Bm**  
Where the years went I can't say  
         **G**                            **A**                    **D**  
I just turned around and they've gone away

**D**                    **G**                    **D**  
I've been sifting through the layers  
         **Bm**                                    **G**  
of dusty books and faded papers  
         **D**                                    **Bm**  
They tell a story I used to know  
   **G**                    **A**                    **D**  
and it was one that happened so long ago

**D**                    **G**      **D**  
Chorus:    It's gone away in yesterday  
                 **Bm**                                    **G**  
                 Now I find myself on the mountainside  
                                 **D**      **A**                    **Bm**   **D**  
                 Where the rivers change direction  
**G**                    **A**                    **D**  
                 Across the great divide

**D**                    **G**      **D**  
Now, I heard the owl a-callin'  
         **Bm**                                    **G**  
Softly as the night was fallin'  
         **D**                                    **Bm**  
With a question and I replied  
         **G**      **A**                                    **D**  
But he's gone across the borderline

Chorus

**D**                    **G**      **D**  
The finest hour that I have seen  
         **Bm**                                    **G**  
Is the one that comes between  
         **D**                                    **Bm**  
The edge of night and the break of day  
         **G**                                    **A**                    **D**  
It's when the darkness rolls away

Chorus - x 2
