Good Time Charlie's Got the Blues

1968 by Danny O' Keefe

```
G                                              Am
Everybody's gone away, said they're moving' to L.A.
  C                        D                          G
There's not a soul I know around. Everybody's leaving' town.
 G
Some caught a freight, some caught a plane.
                                Am
Find the sunshine, leave the rain.
  C                        D
They said this town'll waste your time.
                                G
I guess they're right, it's wastin' mine.

                                    Cmaj7   C6   C *
          Some gotta win, some gotta lose,
         D                        G
          Good time Charlie's got the blues.

 G                                                    Am
You know my heart keeps tellin' me, you're not a kid at thirty-three.
 C                        D                              G
Y' play around ya lose your wife. You play too long you'll lose your life.
                          G                          Am
I've got my pills to ease the pain, Can't find a thing to ease the rain.
C                    D                          G
I'd love to try and settle down, but everybody's leaving town.

                                    C∆  Cmaj7 C6   C
          Some gotta win, some gotta lose,
         D                        G
 ( 2x)    Good time Charlie's got the blues.
```
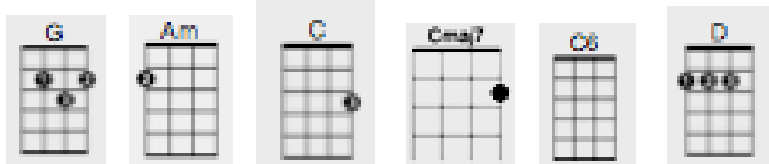

CHORDS USED IN SONG:

* NOTE: You can play JUST the C chord instead of Cmaj7, C6 and C
