

# HOME TO ME

The Junebugs

G                    D    A                    D  
Wish I was a bird, I'd fly on down the road  
G                    D                    A                    D  
Nothing but my flight of fancy, telling me where to go  
G                    D    A                    D  
When the day is done, sun goes to bed  
G                    D                    A                    D  
There's one place in this world, where I would lay my head

Chorus:

G                    D    A                    D  
You are home to me, in the dark of night  
G                    D                    A                    D  
A place where I can keep myself, when you say goodnight  
G                    D    A                    D  
You are home to me

G                    D    A                    D  
Wish I was a fish, I'd swim out in the sea  
G                    D                    A                    D  
Swim a hundred million miles and nothing bothers me  
G                    D    A                    D  
When the moon comes out, as ocean waves grow cold  
G                    D                    A                    D  
There is one girl in this world who I would like to hold

Chorus

G                    D    A                    D  
Wish I was a bear, lie out in the sun  
G                    D                    A                    D  
I'd laze about in the summer heat, Lord I'd have so much fun  
G                    D                    A                    D  
When the winter comes, those mountain tops grow cold  
G                    D                    A                    D  
We'd sleep beneath the snow and sleet, I feel it in my bones

Chorus
